GOVERNMENT OF LONDON

Dunt System Which Will Soon Have to Be Remodeled for the City's Good.

The government of the city of Lon a is a limited democracy, regulated y charters granted by various kings nd queens, the first of the series being rather more than 700 years old. The general body of citizens elect the common council, the councilors elect the aldermen by open voting at the polls, and they choose a lord mayor every year by show of hands in general assembly in Guildhall, subject to the veto, rarely exercised, of the court of alder against kines and nobles, either sword or by purse. In these modern days they have strenuously opposed every reform which seemed calculated to improve the government of that Greater London which has been growing around them with ever increasing rapidity and virility. Their opposition was uniformly successful until ten council was created for the government of Greater London the city persuaded parliament to exempt its square mile from the control of the new body. Thus British empire. This state of things cannot last much longer, for the county souncil has gained the confidence of the people for good work well done, and its power is increasing, while that of the lord mayor and common council is or out with an interview defending the decline. In its earlier years, the county council, with the enthysiasm and indiscretion of youth, tried to do too many things at a time, and needlessly interfered with matters which at that time were best left alone. But today, while still conserving the generous spirit and lofty ideals of early manhood. t possesses the wisdom and tact of middle age.-John Gennings, in Chautauquan.

Old-Time High Buildings. Lanciani, the famous Roman arch-

seologist, has shown that in the Rome of the Caesars trouble was experienced with high buildings. A law was passed restricting the height of fronts to 60 e permitted to serve much longer feet. In order to evade it builders for city politicians. The substantial adopted the practice of carrying up the rear portion several stories more Other laws bearing on the height of buildings were passed in old times. There was a tendency to diminish the height of stories as the buildings in creased in size, and a height of 13feet was probably attained. It is be lieved that the ceilings were so low that a man could not stand upright in the rooms .- Youth's Companion.

He was still looking when She optained none. The city was razed to the ground, only the house of Pindae being spared; the territory was dis tributed among the allies, and the inhabitants who survived, some 30,000 in number, excepting only the priests and priestesses, the descendants of Pindar and the guests, friends of Philip and Alexander, were sold into slavery, making a stave market so vast that, as we "What makes you ask that? Do hear, the standard price of slaves in the markets of the Egean was seriously depressed in consequence. The ordinary price for a slave was from \$20 to \$35. Abundant supply kept

the price low. Society was built on alavery. Slaves, or, as in Sparts and Crete, serfs attached to the soil, were the farm laborers; in manufactories they took the place of modern machinery; they were a form of invest ment, being often rented out in gangs, as for work in the mines; large nun have and 460,000 slaves, Egina 470 000, and a census of the year 309 B.
